

In 1994, Pressure Products
revolutionized vascular access with
the introduction of the SafeSheath*
hemostatic-valved, peel-away
introducer system, providing
problem-free vascular access during
device lead placement for more

Now, SafeSheath II advances the original design, continuing to revolutionize venous access by setting new standards for performance and features while facilitating better outcomes.

PRODUCT DESCRIPTION

The SafeSheath II family of introducers combines the time-tested design of a tear-away sheath and hemostatic valve with new and improved features to reduce back bleeding and the possibility of air embolism during venous access.

SafeSheath II Introduced into the subclavian vein in the standard manner, the hemostatic valve of the SafeSheath II seals the device during lead introduction and positioning.

The easy splitting, ergonomically-shaped breakaway hub greatly simplifies sheath removal after lead or catheter placement. Extruded score line construction ensures a clean, even peel every time. A new elastomer snap-locking dilator connector assures a firm attachment to the sheath.

The three-way stopcock side port provides a convenient means of aspirating and flushing the introducer, as well as for contrast and fluid administration. Finally, the advanced design of the lubricated hemostatic valve enables low insertion and withdrawal forces, delivering greater control during lead manipulation.

SafeSheath II Long The 23cm Long provides access beyond the right subclavian-SVC junction, from both the left cephalic and subclavian veins. The extra length helps when upgrading existing systems by the addition of new leads and for atypical venous access sites—axillary or femoral. It also acts as a 'supporting' platform for the introduction of defibrillator leads.

SafeSheath® II

Hemostatic Peel-away Introducer System for Vascular Access

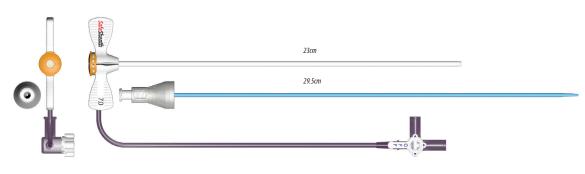

SAFESHEATH II

Used for lead introduction and positioning during cardiac resynchronization the rapy.

SAFESHEATH II LONG

For access beyond the right subclavian-SVC junction.

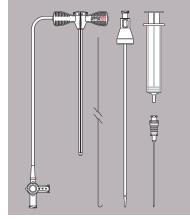

ORDERING INFORMATION

Each **SafeSheath II** Introducer System kit includes:

- ► One tear-away sheath w/side port
- One dilator
- One 18g needle
- One 10cc syringe
- One guidewire (Standard-50cm / Long-60cm)

Five (5) kits per box

SafeSheath is a registered trademark of Pressure Products Medical Supplies, Inc.
